COMPLAINT FOR DAMAGES

NOW COMES PLAINTIFF, by and through her undersigned Counsel of Record, and, pursuant to the Federal Rules of Civil Procedure, files this Complaint for Damages against the Defendants named above, showing the Court as follows:

NATURE OF THE ACTION

- At approximately 12:15 pm on December 6, 2016, a preventable tragedy at a Calhoun County industrial facility resulted in Alton Ray Zeigler, a husband, father, and grandfather, dying from asphyxiation as a result of the inhalation of foreign materials following an explosion which propelled an industrial pump, which weighs approximately 300 pounds, almost nine feet across a workspace before coming to rest as it put a hole in a cement block wall. This tragedy, which also involved two of Mr. Zeigler’s co-workers suffering catastrophic, life-threatening burns, forms the basis of survival and wrongful death causes of action. Plaintiff seeks actual and consequential damages as well as punitive damages to halt and

deter such conduct from taking place in the future.

THE PARTIES, JURISDICTION, AND VENUE

7. This Court has subject matter jurisdiction over this action pursuant to 28 U.S.C. § 1332 because there is complete diversity of citizenship between Plaintiff and the Defendants, and the amount in controversy exceeds \$75,000.00 exclusive of interest and costs.

9. All conditions precedent to the filing of this action and to the Plaintiff's right to the relief sought have occurred, have been performed, or have been excused.

FACTS COMMON TO ALL COUNTS

10. Plaintiff adopts and re-alleges each prior paragraph, where relevant, as if set forth fully herein.
11. Eastman is a global chemical company which manufactures and sells a broad portfolio of chemicals, plastics, and fibers.
12. Eastman began business in 1920 for the purpose of producing chemicals for Eastman Kodak Company's photographic business and became a public company, incorporated in Delaware, as of December 31, 1993.

13. In 1967, Eastman opened a facility, known as Carolina Eastman, on the banks of the Congaree River near Sandy Run a few miles northeast of Gaston in Calhoun County, South Carolina.
14. The Carolina Eastman facility subsequently began manufacturing polyethylene terephthalate which is also known as PET and commonly used in soda bottles.
15. On January 31, 2011, Eastman sold its PET business and related assets at Carolina Eastman to DAK Americas, LLC, a subsidiary of Alpek S.A.B. de C.V., a Mexican chemical manufacturing company.
16. Eastman retained a portion of the Carolina Eastman facility related to its Specialty Plastics segment subsequent to this sale, specifically retaining about 15 percent of the assets of the former Carolina Eastman facility.
17. As a result, beginning on February 1, 2011 and continuing as of December 6, 2016, Eastman owned property located at 500 K Avenue Gaston, South Carolina 29053.
18. However, beginning on February 1, 2011 and continuing as of December 6, 2016, Eastman employed less than five individuals at 500 K Avenue Gaston, South Carolina 29053.
19. In contrast, beginning on February 1, 2011 and continuing as of December 6, 2016, DAK Americas LLC owned property located at 570 K Avenue Gaston, South Carolina 29053 and employed more than 400 individuals.
20. Beginning on February 1, 2011 and continuing as of December 6, 2016, Eastman produced specialty plastics that are used in specialty films and packaging products sold into durables, packaging and other consumer products from the property it

retained at the former Carolinas Eastman facility.

21. Beginning on February 1, 2011 and continuing as of December 6, 2016, Eastman was not equipped to handle repairs to the property it retained at the former Carolinas Eastman facility with its own work force.
22. As a result, beginning on February 1, 2011 and continuing as of December 6, 2016, maintenance of the property Eastman retained at the former Carolinas Eastman facility was not a part or process of Eastman's business nor was it a core function of Eastman's actual business conducted at this location.
23. Moreover, beginning on February 1, 2011 and continuing as of December 6, 2016, maintenance of the property Eastman retained at the former Carolinas Eastman facility was not normally carried on by Eastman employees.
24. On December 6, 2016, Plaintiff's decedent, Alton Ray Zeigler, was a W2 employee of DAK Americas, LLC.
25. On December 6, 2016, Plaintiff's decedent, Alton Ray Zeigler, was not a W2 employee of Eastman or one of its subsidiaries.
26. On December 6, 2016, Eastman, including its subsidiaries, did not have the right to control the details of Mr. Zeigler's work.
27. By way of example, on December 6, 2016, Eastman, including its subsidiaries, did not exercise control over Mr. Zeigler's work.
28. By way of further example, on December 6, 2016, Eastman, including its subsidiaries, did not control the method of Mr. Zeigler's payment.
29. By way of further example, on December 6, 2016, Eastman, including its subsidiaries, did not furnish Mr. Zeigler equipment.

30. By way of further example, on December 6, 2016, Eastman, including its subsidiaries, did not have the right to fire Mr. Zeigler.
31. On December 6, 2016, Plaintiff's decedent Alton Ray Zeigler's work for Eastman was casual in nature, not regular in nature.
32. On December 6, 2016, Plaintiff's decedent Alton Ray Zeigler's work for Eastman was not an important part of the trade or business of Eastman as it did not involve the manufacturing of chemicals, plastics, and/or fibers.
33. On December 6, 2016, Plaintiff's decedent Alton Ray Zeigler's work for Eastman was not identical to work that Eastman's direct employees would regularly perform at 500 K Avenue Gaston, South Carolina 29053.
34. On December 6, 2016, Plaintiff's decedent Alton Ray Zeigler's work for Eastman was not identical to work that Eastman's direct employees had performed since February 1, 2011 on the pipeline(s) owned by Eastman.
35. Founded in 1955, Mundy is a privately owned business which provides various types of industrial maintenance and contracting services for customers in the Petrochemical, Chemical, Refining, Pharmaceutical and Biotech, Oil and Gas, Manufacturing and Film and Fiber industries.
36. During the several days immediately prior to December 6, 2016, Eastman arranged for Mundy to work on a pipeline owned by Eastman.
37. Specifically, Mundy was to clear a drain line in Eastman's pipeline.
38. Mundy's employees could not get the drain valve to open despite accumulating a significant amount of overtime.
39. After one of Mundy's employees abandoned this job because of the lack of

progress, another Mundy employee began heating the exterior of the crystalline structure pipe for an extended period of time.

40. As a direct and proximate result of this extended heating process, a fire occurred which caused damage to the pipe itself, insulation, and other nearby equipment.
41. Upon information and belief, this fire was extinguished by one or more fire extinguisher(s).
42. As a direct and proximate result of this fire, the material inside the subject drain pipe, a monomer product, decomposed, was altered, and/or converted some liquid into gas.
43. The degradation of the monomer increased the pressure inside the pipeline and turned the conditions soon to be experienced by the DAK crew, whose job was to remove a pump, into a bomb waiting to happen.
44. On December 6, 2016, DAK employees Jacob Jackson, Kevin Vann, and Plaintiff's decedent, Alton Zeigler, (hereinafter "the DAK crew") prepared to repair an approximately 300 pound pump owned by Eastman which had been leaking and was in the same pipeline as the drain line worked on in the preceding days by the Mundy employees.
45. The DAK crew was issued an Unusual Job Permit ("UJP") to perform the repairs on the pump by Eastman's Douglas Steve Rister.
46. Mr. Rister did not, however, provide the DAK crew with any written information about this job other than the UJP.
47. Mr. Rister told the DAK crew to anticipate that a small amount of monomer product would be released when the pump was removed.

48. Prior to removing the pump, all valves were shut off and “locked out” in accordance with all applicable rules, regulations, and/or protocols.
49. Specifically, Mr. Rister placed a lock on each valve.
50. At no point in time, however, did Eastman, by and through its officers, directors, employees, and/or agents, warn the DAK crew of all of the dangers and risks associated with removing the pump which were known by Eastman, through its officers, directors, employees, and/or agents.
51. Specifically, the DAK crew was unaware that the material inside the subject drain pipe, a monomer product, had decomposed, was altered, and/or converted some liquid into gas as a result of the recent fire event.
52. In addition, Eastman, by and through its officers, directors, employees, and/or agents, had vastly superior knowledge of the material in its pipeline, including its chemical properties, than the DAK crew.
53. The pipeline is heated by a Dowtherm line which maintains the material at 300 degrees Celsius.
54. The DAK crew loosened bolts on three flanges on the Dowtherm lines using pneumatic tools.
55. The DAK crew then loosened the pump bolts, breaching the pipeline.
56. As the DAK crew began preparations to remove the pump, a small amount of monomer product exited the pipeline through the pump.
57. Once the small amount of monomer product exited the pipeline through the pump, the DAK crew believed that the only danger warned of by Eastman’s Douglas Steve Rister had passed.

58. Shortly thereafter, an explosion occurred, the force of which projected the pump, which weighs approximately 300 pounds, almost nine feet across the workspace before coming to rest as it put a hole in a cement block wall.
59. The blast also covered the workspace with as much as 500 gallons of the heated monomer product causing serious injuries to the three members of the DAK crew in the immediate vicinity.
60. Plaintiff's decedent, Alton Ray Zeigler, experienced conscious pain and suffering as a result of his injuries and subsequently died as a result of this tragic incident.
