Status: Mitigated

Impacted Areas: Instagram > Well-Being, Instagram > Community, Privacy Incident, Privacy Incident > Security, Privacy Incident > Privacy, Instagram

Level: 3

Created at: 2022/06/23 10:33am PDT **Started at:** Not Specified

How the issue was detected: whitehat-reporting

User impact: A blackhat is able to bypass delta on an account they've hacked by reporting it for being underage. They then abuse the underage flow support flow, which when they complete remove underage checkpoint from the account, allowing the attacker to complete a successful login, bypassing logged-out delta flow.
