

# **EXHIBIT 179**

## Issues by all age groups

Younger people report higher rates of every issue, with some issues felt more universally than others

In general, the older the respondent, the less likely they are to report experiencing any of the 22 issues measured. All red cells (the age group with the highest rate of experiencing an issue) are within the four youngest age groups.

The gap between the lowest and highest issue rates vary by issue. Bullying witness, for instance, has the widest delta: 31.1% of the 22-26 age group report experiencing it, compared to only 10.6% of the 45+ group, a delta of 20.5 percentage points. Other large deltas include usability passive (delta = 20 points), hate witness (19.5), and misinfo (17.5).

By contrast, certain issues are experienced at similar rates regardless of age. For example, drug sales (delta = 2.1), account security (3.9), and usability action (4.6).

|                     | Overall % | 13-15      | 16-17      | 18-21      | 22-26      | 27-34      | 35-44      | 45+        | Delta          |

## PREVALENCE

How prevalent were child endangerment violations?

We cannot estimate prevalence for child endangerment right now. We will continue to expand prevalence measurement to more areas as we confirm accuracy and meaningful data.
