January 2020

Exec Council refreshed

Attorney-Client Privileged & Confidential

- Refreshed Tiger Team with active engagement from your teams
- Co-ownership of this Exec Council by [REDACTED] and [REDACTED] to ensure greater relevance from a x-PA standpoint
- **Topics for today:**
 - Address any concerns with longer-term vision
 - Align on short list of P0 topics from this group's POV - what would you like to cover together in 2020? (juxtapose against Tiger Team shortlist)
 - Discuss a few key areas:
 - **Private scanning** - very high volumes. Will heighten focus on reviewer wellness, in particular.
 - **Trust** - opportunities to provide more industry leadership?
 - **Age verification** - UK ICO launched, begin to discuss approach.

Deep Dive #3: Imminent regulation will raise the bar on Google's approach to age verification

GDPR	Age verification requirement implicit; service providers must use age-verification methods proportionate to the nature and risks of the underlying processing
UK ICO Age Appropriate Design Code (Q1-21 likely enforcement deadline)	- Requires online services provide either a child-appropriate experience for all users, or apply an "age assurance" model with a sliding scale of different levels of age verification depending on nature and risks associated with processing - Also includes requirements for conservative default settings, additional location data restrictions, and other data minimization requirements
Irish DPC	Expected to publish guidance on children's data processing, including age verification, imminently.
EU Audiovisual Media Services Directive (Sep-20 enforcement)	Video sharing platforms (e.g., YT, Google Play Movies and TV) required "to establish and operate age verification systems for users of video-sharing platforms with respect to content which may impair the physical, mental or moral development of minors."
