Margaret Gould Stewart (3/13/2019 15:38:35 PDT):

>Important to note that just because they haven't found evidence of causation doesn't mean that it doesn't exist; they may just not have find the way to detect/measure it. I can tell you as someone who spends a LOT of time with teenage girls, both in my own home and through the high schools, it seems patently obvious that phone usage, selfie-culture, and photo editing are contributing to anxiety, depression, and body dysmorphia. While we may not have a smoking gun on the cause, I think we have to assume we are contributors/amplifiers and tread very carefully on anything that further contributes.

Margaret Gould Stewart (3/13/2019 16:31:42 PDT):

>Reading through the UK doc, I see similar sentiments:

Margaret Gould Stewart (3/13/2019 16:31:43 PDT):

>"Even though no causal effect is evident from existing research between screenbased activities, or the amount of time spent using screens, and any particular
 >negative effect, it does not mean that there is no effect. It is still wise to take a
 >precautionary approach. This needs to be balanced, however, against the
 >potential benefits that CYP can derive from their screen-based activities. "
