Subject: Message summary [{"otherUserFbId":100021115041052,"threadFbId":null}]

Parth [REDACTED] (5/11/2021 02:12:53 PDT):
>Did SEV got fixed: <https://fburl.com/daiquery/k7ld5pzj?>

Parth [REDACTED] (5/11/2021 02:13:17 PDT):
>I don't see any miss between mms_decisions and photo_match

Jennifer Malia [REDACTED] (5/11/2021 02:13:24 PDT):
>They are mitigating :)

Jennifer Malia [REDACTED] (5/11/2021 02:13:29 PDT):
>Also the SEV was at the match time

Jennifer Malia [REDACTED] (5/11/2021 02:13:37 PDT):
>So it wouldn't be caught here.

Parth [REDACTED] (5/11/2021 02:13:56 PDT):
>so, we weren't even matching things?

Jennifer Malia [REDACTED] (5/11/2021 02:14:12 PDT):
>Right. The match didn't go through because of about three issues.

Parth [REDACTED] (5/11/2021 02:14:19 PDT):
>also, would you mind looking into this:
https://www.internalfb.com/intern/unidash/dashboard/cei_banking_dash/cei_possible_decision_miss/

Parth [REDACTED] (5/11/2021 02:14:34 PDT):
>okay, I don't think we will be able to alert on it for now

Jennifer Malia [REDACTED] (5/11/2021 02:14:53 PDT):
>The alert that would have caught was the alert on different delete sources

Parth [REDACTED] (5/11/2021 02:15:30 PDT):
>bad news:
>1. We are missing so many NCMEC reports
>2. logs for check points are missing everywhere, not even in dim_checkpoints.. table

Parth [REDACTED] (5/11/2021 02:15:36 PDT):
>I think we have it now right?

Parth [REDACTED] (5/11/2021 02:15:40 PDT):
>alert on top X sources

Parth [REDACTED] (5/11/2021 02:16:06 PDT):
>good news:
>1. Disable actions are working fine
>2. Delete actions are working fine

Jennifer Malia [REDACTED] (5/11/2021 02:16:07 PDT):
>Yep! Just saying that if the content doesn't even *match*, the only way we can find a big sev is through delete counts.

Jennifer Malia [REDACTED] (5/11/2021 02:16:21 PDT):
>I am very #notsurprised

Parth [REDACTED] (5/11/2021 02:16:57 PDT):
>so question is: how do we verify if our checkpoint count are correct. I have lost so many days figuring it out :(

Parth [REDACTED] (5/11/2021 02:17:15 PDT):
>I mean in centra we see checkpoint is there, but there is no way to confirm it via any table

Jennifer Malia [REDACTED] (5/11/2021 02:17:28 PDT):
>Checkpoints should be in dpef and pac_actions

Jennifer Malia [REDACTED] (5/11/2021 02:17:48 PDT):

>I would talk to Marina about this actually

Parth [REDACTED] (5/11/2021 02:17:53 PDT):

>I tried dpef and dim_checkpoint (or something similar) table

Parth [REDACTED] (5/11/2021 02:18:04 PDT):

>on NCMEC report I could verify we are not reporting them

Parth [REDACTED] (5/11/2021 02:18:14 PDT):

>due to ePD check or some times there is no report at all

Jennifer Malia [REDACTED] (5/11/2021 02:18:26 PDT):

>Wait hold on, which are we talking about here.

Jennifer Malia [REDACTED] (5/11/2021 02:18:27 PDT):

>?

Parth [REDACTED] (5/11/2021 02:18:44 PDT):

>sorry, I am very bad at this

Jennifer Malia [REDACTED] (5/11/2021 02:18:49 PDT):

>We have users that we haven't reported but we deleted CEI?

Jennifer Malia [REDACTED] (5/11/2021 02:19:00 PDT):

>no worries, this is all super complicated

Parth [REDACTED] (5/11/2021 02:19:00 PDT):

>oin NCMEC there is definitely something wrong and we are missing out sending reports

Jennifer Malia [REDACTED] (5/11/2021 02:19:12 PDT):

>On the content itself?

Parth [REDACTED] (5/11/2021 02:19:23 PDT):

>both on content and on user

Jennifer Malia [REDACTED] (5/11/2021 02:19:27 PDT):

>We will sometimes not send a NCMEC report because we've determined [REDACTED]

Parth [REDACTED] (5/11/2021 02:19:54 PDT):

>but I could see [REDACTED]

Jennifer Malia [REDACTED] (5/11/2021 02:19:56 PDT):

>Right now I'm not sure what tracking we have to ascertain if a lack of NCMEC report is *intended* or *not intended*

Jennifer Malia [REDACTED] (5/11/2021 02:20:16 PDT):

>Yes. This is an issue. How far back and do we need to open a sev?

Parth [REDACTED] (5/11/2021 02:20:33 PDT):

>so if report is ignored then it is intended, if there is no report at all then it would not intended right?

Jennifer Malia [REDACTED] (5/11/2021 02:20:59 PDT):

>A NCMEC report?

Jennifer Malia [REDACTED] (5/11/2021 02:21:05 PDT):

>What kind of report?

Parth [REDACTED] (5/11/2021 02:21:15 PDT):

>yes NCMEC report

Jennifer Malia [REDACTED] (5/11/2021 02:21:45 PDT):

>ok. So I would ask Mireille what logs happen when we intentionally don't close a NCMEC report.

Parth [REDACTED] (5/11/2021 02:22:02 PDT):

>sure

Jennifer Malia [REDACTED] (5/11/2021 02:22:24 PDT):

>I usually look at the discrepancy between delete and NCMEC report, and if it's big, that's an alert.

Jennifer Malia [REDACTED] (5/11/2021 02:22:48 PDT):

>Then a person could look to see if it's explainable (big [REDACTED] cluster, etc)

Parth [REDACTED] (5/11/2021 02:22:55 PDT):

>there are banks which only deletes and don't ncmecc report.. but yes, we can sepearate deletes to only NCMEC reporting banks

Parth [REDACTED] (5/11/2021 02:23:04 PDT):

>makes sense

Jennifer Malia [REDACTED] (5/11/2021 02:23:11 PDT):
>there should not be a CEI bank that deletes but doesn't report

Jennifer Malia [REDACTED] (5/11/2021 02:23:18 PDT):
>if there is, we're not in legal compliance

Parth [REDACTED] (5/11/2021 02:23:32 PDT):
>no, not CEI bank, but this is on all Child Safety banks

Jennifer Malia [REDACTED] (5/11/2021 02:24:11 PDT):
>So for this check, you'll need to separate out CEI, since we only report to NCMEC on CEI content. (IIC manuals, but that's not your area)

Parth [REDACTED] (5/11/2021 02:24:29 PDT):
>yes, makes sense

Parth [REDACTED] (5/11/2021 02:25:02 PDT):
>but if there is mms_decision for IActionReportToNCMEC and we didn't take any action, wouldn't it also mean the same thing?

Jennifer Malia [REDACTED] (5/11/2021 02:25:51 PDT):
>Well ... this is really two checks:
>1. Did the thing with IActionReportToNCMEC have the violation type CEI?
>2. Did the NCMEC report actually complete?

Jennifer Malia [REDACTED] (5/11/2021 02:26:09 PDT):
>BUT yes, only CEI (or a few NCII banks) have NCMEC actions

Parth [REDACTED] (5/11/2021 02:30:57 PDT):
>makes sense.. We have first in place, I will check with Mireille on second

Jennifer Malia [REDACTED] (5/11/2021 02:39:04 PDT):
>I think in the absence of "official" logging, we can just check CEI deletes against NCMEC reports. I'm ok with that being the check for War Room exit and working on getting something more specific later.

Parth [REDACTED] (5/11/2021 09:19:52 PDT):
>checked with Mireille on NCMEC fails,
>there was an issue with banking content check which is causing this issue

Parth [REDACTED] (5/11/2021 09:20:06 PDT):
>so this would be failing for so many sources, including videntifier match

Parth [REDACTED] (5/11/2021 09:20:15 PDT):
>it is like 10k NCMEC report missing/day for month?

Parth [REDACTED] (5/11/2021 09:20:18 PDT):
>Is it SEV-3?

Jennifer Malia [REDACTED] (5/11/2021 09:26:26 PDT):
>Yikes. Yeah, according to <https://fburl.com/ww93i715> this is sev3
