Subject: Message summary [{"otherUserFbId":null,"threadFbId":3647762481996302}]

Christopher [REDACTED] (1/19/2022 02:15:54 PST):
>can't make standup folks, mashing up

Charles Rory [REDACTED] (1/19/2022 02:16:01 PST):
>Likewise

Jennifer Malia [REDACTED] (1/19/2022 02:16:53 PST):
>Fine. Manager things, you're so important.

Christopher [REDACTED] (1/19/2022 05:11:38 PST):
>S258090

Christopher [REDACTED] (1/19/2022 05:11:41 PST):
>just as a heads up

Christopher [REDACTED] (1/19/2022 05:11:48 PST):
>looks like SDI again

Christopher [REDACTED] (1/19/2022 05:23:10 PST):
>if this is true, it's a disaster - we're literally [REDACTED] ? surely not?

Christopher [REDACTED] (1/19/2022 05:23:23 PST):
>if true it needs a sev upgrade and some tight comms

Christopher [REDACTED] (1/19/2022 05:24:08 PST):
>gonna go wider w/ this actually

Jennifer Malia [REDACTED] (1/19/2022 05:26:21 PST):
>*sigh*

Jennifer Malia [REDACTED] (1/19/2022 05:26:35 PST):
>Let's backchannel Irakli?

Jennifer Malia [REDACTED] (1/19/2022 05:30:02 PST):
>And, I guess Aditya. I want to understand how this was found.

Jennifer Malia [REDACTED] (1/19/2022 05:30:54 PST):
>I think by volume this is a legitimacy disaster but not an enforcement one. If that makes sense.

Charles Rory [REDACTED] (1/19/2022 05:34:10 PST):
>Holy moly

Jennifer Malia [REDACTED] (1/19/2022 05:35:05 PST):
>I do think this is only hashes we ingested from NCMEC. Which is super no bueno, but also a fraction of total, pretty sure.

Jennifer Malia [REDACTED] (1/19/2022 05:36:44 PST):
>But that's the first question.

Charles Rory [REDACTED] (1/19/2022 06:28:30 PST):
>Some rough scuba diving suggests that vmd5 is about 10% of our Facebook public CSAM enforcement

Charles Rory [REDACTED] (1/19/2022 06:28:51 PST):
>(For MMS only)

Jennifer Malia [REDACTED] (1/19/2022 06:28:57 PST):
>So we think that maybe this would be commensurate on chat if we were looking there.

Charles Rory [REDACTED] (1/19/2022 06:29:28 PST):
>That is my naive assumption.

Charles Rory [REDACTED] (1/19/2022 06:29:47 PST):
>Going into another secret manager judgement session but can check properly once I'm out

Charles Rory [REDACTED] (1/19/2022 06:29:53 PST):
>https://fburl.com/scuba/pms_actions/20sew6uj

Jennifer Malia [REDACTED] (1/19/2022 06:30:13 PST):
>It's prob reasonable in the absence of other intel.

Jennifer Malia [REDACTED] (1/19/2022 06:30:50 PST):

Jennifer Malia [REDACTED] (1/19/2022 06:30:58 PST):
>(judgey face)

Christopher [REDACTED] (1/19/2022 06:31:15 PST):
><https://fb.workplace.com/groups/246860589150489/permalink/1300747337095137/>

Jennifer Malia [REDACTED] (1/19/2022 07:26:17 PST):
>The question I'm asking in the SEV chat is a tad nuanced. I want to understand what fraction of clusters that have a [REDACTED] hash *also* have another hash.

Jennifer Malia [REDACTED] (1/19/2022 07:26:34 PST):
>This would tell us how useful [REDACTED] strategy is actually at this point.

Jennifer Malia [REDACTED] (1/19/2022 07:36:32 PST):
>Ok, @Felix that's another useful number here. It will tell how blind we are to certain content. If they *all* have other hash types, then we don't really need to worry over time. If like 5% of them do ... then we're likely in trouble.

Jennifer Malia [REDACTED] (1/19/2022 07:36:45 PST):
>make sense?

Felix [REDACTED] (1/19/2022 07:41:16 PST):
>Yeah, basically you are wondering to what extend [REDACTED] clusters are covered by other banks

Felix [REDACTED] (1/19/2022 07:41:31 PST):
>If it was 100% - we wouldn't need [REDACTED]

Jennifer Malia [REDACTED] (1/19/2022 07:43:06 PST):
>Well ... we wouldn't need to be worried. We'd ingest and then find a copy on public FB and it would all be ok.

Jennifer Malia [REDACTED] (1/19/2022 07:43:18 PST):
>Not other *banks*, other hashes

Jennifer Malia [REDACTED] (1/19/2022 07:44:13 PST):
>ingest [REDACTED] hash --> bank --> match public FB --> convert this content into all the other hash types --> store all hash types on cluster --> now we can run all hash algos on this cluster

Jennifer Malia [REDACTED] (1/19/2022 07:44:29 PST):
>So you can still subset to the banks with [REDACTED]

Jennifer Malia [REDACTED] (1/19/2022 07:44:53 PST):
>but you'd look for the number of *clusters* that had both [REDACTED] and also other hash matches.

Felix [REDACTED] (1/19/2022 07:45:12 PST):
>Oh, I see, this is for after we actually fixed the issue?

Jennifer Malia [REDACTED] (1/19/2022 07:45:51 PST):
>It should happen to a lesser extent now. This is the thing [REDACTED] is like "shouldn't this just be fine? we ingest, find all the other hashes and these cover Messenger?"

Jennifer Malia [REDACTED] (1/19/2022 07:46:18 PST):
>And the answer is: Only if the content is traded on FB public. If it's only Messenger/IGD/IG, then we can't actually get the other hash types.

Jennifer Malia [REDACTED] (1/19/2022 07:47:05 PST):
>The question is "For how many clusters that we ingest, does this 'find the other hashes from a match' trick work?"

Jennifer Malia [REDACTED] (1/19/2022 07:57:34 PST):
>Assuming we're not doing standup today at 4:45 because we're doing team time

Charles Rory [REDACTED] (1/19/2022 08:32:27 PST):
>I can join if we want to sync with CO. I've missed half of the social now anyway

Charles Rory [REDACTED] (1/19/2022 08:32:50 PST):
>I can join if we want to sync with the US folks. I've missed half of the social now anyway

Jennifer Malia [REDACTED] (1/19/2022 08:35:55 PST):
>We're still drawing ... or failing at drawing :)

Christopher [REDACTED] (1/19/2022 08:40:53 PST):
>shall i cancel standup?

Christopher [REDACTED] (1/19/2022 08:40:55 PST):
>could use the time

Charles Rory [REDACTED] (1/19/2022 09:47:44 PST):
>Got the green light to hire a backfill for Shilpa

Charles Rory [REDACTED] (1/19/2022 09:47:51 PST):
>Wasn't expecting that tbh

Christopher [REDACTED] (1/19/2022 09:54:39 PST):
>oh nice

Charles Rory [REDACTED] (1/19/2022 09:54:54 PST):
>Definitely going to need to insert a layer....

Charles Rory [REDACTED] (1/19/2022 09:54:56 PST):
>☺

Christopher [REDACTED] (1/19/2022 09:55:01 PST):
>maybe 2 layers

Christopher [REDACTED] (1/19/2022 09:55:09 PST):
>👀

Christopher [REDACTED] (1/19/2022 09:55:13 PST):
>build that empire

Jennifer Malia [REDACTED] (1/19/2022 09:57:06 PST):
>👍

Jennifer Malia [REDACTED] (1/19/2022 10:10:38 PST):
>Ok, so update on the meeting with Policy on how to structure the disables going forward.
>1. Probably we'll have to do these in bulk chunks like SNDs for the near term. Shane is grappling with this but hopefully it will be something like every couple of weeks we present.
>2. Vigorous debate on how to instrument longterm (restructure IS or what).
