Subject: [Heads up] IIC E2EE Proactive Risk Investigation

I'm reaching out to provide you a heads-up that the Community Risk Assessment team is kicking off a proactive risk investigation into inappropriate interactions with children with a focus on preparing for end to end encryption. Our team identified this topic after assessing a variety of risk metrics (both internal and external), though I'd be happy to provide more specifics around this choice if you are interested. The aim of this investigation is to **proactively** uncover risks within our systems, processes and policies and address vulnerabilities that impact our community and reputation.

If you are receiving this email, it is because we believe the work you do relates to the topic of this investigation in some way. Your input and collaboration will be critical to its success. **At this point in time, no action is required from you**, but we want to make sure you're aware of this effort in case we reach out to you.

We would also appreciate if you could make us aware of other teams and people who are working in this space if they are not already on this email. We thank you for your time in advance and we look forward to working with you!
