Subject: Re: awsm data

Hi Courtney and Dan,

I took some time to look through some of the results and tried to organize a few things into some dichotomous variables or variables that resemble ones we've used in YRRS. I wanted to share a set of charts from glancing at it. Extremely interesting! The main take away for me is that there is so much in this survey to explore and work on... I was fighting lots of overwhelming feelings to get this far because there's just so much and I'm not used to having granular ways of looking at questions that are available here.

As an example of something I spotted that interested me - 55% of students had any use of TikTok, however, 88% of the students who attempted suicide were also TikTok users:

The other platforms I glanced at did not have this strong of a relationship.

Look forward to talking more and seeing what you all end up doing with the data!!

Be well,

Hey Courtney,

I started to peek at the data and am writing some notes. I know we talked about this last week and I tried glancing at the minutes, but can you remind me of the next step? Should I just write a list of notes/comments/highlights and share them during our next regular AWSM meeting or did you and I want to get together to do a review just between us?

Have to say glancing at things, I am really excited and think there will be a strong case for a larger and more representative survey. Really excited to talk with you all about it!

Be well,
