Wanted to share this with you re the cosmetic surgery effects issue coming to mark this week. You may have shrewdly synced with Sheryl in this but wanted you to know her stance.

Adam is concerned since IG has the most usage of these effects. Boz, fidji, Stan all seem to be for lifting, and the i18n team is trying to make the case that we are projecting western values which doesn't hold water for me when it comes to safety. I've been pushing on this issue for over a year so am very appreciative of your support.

I am strongly against lifting this ban. That is why I am joining the meeting

I heard you will be at the meeting with mark and I'm glad. I've been trying to encourage the teams to think longer term about the possible harm but what I hear back from some is since there's no proof of harm we should lift restrictions. It will be many years before we have causal data if ever. But current expert climate is highly negative towards these effects especially for minors. As two of the only execs with teenage daughters I think you and I may have a particular

perspective on this stuff. Happy to sync in advance if it would be helpful but I suspect Monika and nick have briefed you. Just wanted to say that I'm glad you'll be there!
